The Trustwave Difference

- Our patent-pending threat hunting methodology allows us to conduct 300% more higher-quality human-led threat hunts per year for indicators of behavior across our global client base.
- We help deploy the right security controls in the right place, and fine tune your technology to properly protect from and detect threats
- We ensure you get the highest return across your portfolio of cyber investments, with an accelerated time to value
- We ingest telemetry across your technology suite – not just your EDR – to identify and understand threats and their impact
- We grow with our customers! You have a partner that can collaborate and advise you on the evolution of your security strategy and program
- You will have a dedicated Cyber Success Team and a named resource with you for the life of the service contract

The Trustwave Partner Advantage

- No channel conflict - our channel sales team works side by side with our direct sales team and security engineers who will handle everything from discovery to contract signing. We work to provide your customers with a solution that is designed exclusively for their organization
- Utilize our Trustwave Security Colony to help your customers with vulnerability and readiness assessments
- Leverage our partner program benefits and online portal for training tools, sales guides and co-marketing resources
- Take advantage of key technology alliance partnerships which augment the broad Trustwave portfolio of security services available for your customers - currently we support over 360 technologies
- Access to proposal based Market Development Funds to generate and progress your pipeline, plus one-off marketing support as needed. Special customer and partner offers, promotions, and trials
