

# LastPass Impact Program

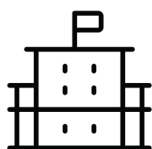

We are deeply committed to levelling the playing field for under-served sectors. These entities are facing significant cybersecurity challenges and are often under-resourced, under-funded and under-attack.

The programs' mission is to help address the gaps often found within the fundamental areas of cybersecurity such as the secure and effective management of credentials. By working to address these gaps we are ultimately empowering organisations to mitigate risks and safeguard their sensitive data from constantly evolving cyber threats.

#### Charities

Protect the integrity of their fundraising efforts

#### Governments

Fortify critical infrastructure and citizen services

#### Schools

Safeguard student information and educational resources

#### Non-Profit

Ensure the security of donor data and operational systems

***"With over a hundred thousand members, it's key that we put measures in place to protect all sensitive data within our organisation"***

- Scott Randall, ICT Manager, Surf Life Saving

**Significant savings are available through this program. Find out how this can benefit you or your customers.**

# Comprehensive Security Protection

With 80% of data breaches being the result of weak, reused, or stolen credentials. Eliminate this credentials crisis by expanding password security and making it pervasive across all end users, apps, and data. Focus on your mission, we'll keep you and your employees safe.

## Best in-class encryption

Your stored passwords are encrypted and decrypted only at the device level.

## Global security third-party certifications

ISO 27001, SOC2 Type II, SOC3, BSI C5, TRUSTe, and more to match your company's compliance.

## Protect against the dark web

LastPass protects your data and notifies you when it gets compromised.

## Full endpoint protection

Enable additional authentication to protect your account.

By streamlining password management, LastPass enables everyone in your organisation to navigate their digital environments at work and at home with confidence, knowing that their accounts and sensitive information are safeguarded against unauthorised access.

Discover how LastPass can help you protect your passwords and business. These short 1-2 minute demos cover:

- Key features, like password generator, save and autofill, password sharing.
- Enterprise password management.
- User management controls, like directory integrations and customizable policies.
- Security dashboard and reporting.
